

A.M.Y.®

A.M.Y.®

Antimicrobial protection is embedded into the fibers - not sprayed on - to control odors.

Clothes Smell Fresher

A.M.Y.®

POTENTIAL BENEFITS:

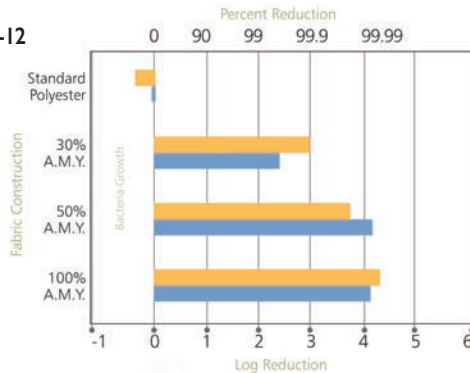

- Inhibits the growth of odor-causing bacteria, mold, mildew and algae on fabrics*
- Inherent odor protection
- Use of additional topical chemicals not required to achieve performance characteristics
- Fabric construction must contain at least 30% A.M.Y. by weight
- Combines well with other proprietary additives or finishes for additional benefits

AVAILABLE:

- Available globally for polyester filament on **REPREVE®** and **ProFiber™** yarns

AATCC Test Method 100-12

- Microbe A
- Microbe B

with A.M.Y.

A.M.Y. Polyester
 Inhibited Bacteria Growth
 Log 4+ Reduction
 Odor Free

without A.M.Y.

Standard Polyester
 Bacteria Growth
 No Log Reduction
 Odor Present

TTC Agar Assay Test Method

- Plate "Contact Method" samples tested against bacteria Microbe A
- Microbe A that survive grow between sample agar to produce red colonies

END USES:

For fabric construction recommendations and dyeing and finishing guidelines, please refer to the Unifi Code of Best Practices.

For fabric certification and branding support, all products must undergo testing to ensure fabric quality and integrity.

A.M.Y.® does not protect the wearer from odor-causing bacteria
