

Waterwise™

# Waterwise™

This greener way to dye fabrics protects precious water resources as it locks vibrant color into your clothes.

# Locked-in color that lasts

Waterwise™

## POTENTIAL BENEFITS:

- Helps conserve water and energy, using fewer natural resources
- Can be inherently colorfast, durable, bleach resistant and UV lightfast, depending on the design of the product
- Superior brilliant color uniformity
- Precise custom mixing provides enhanced capability to match colors
- Many pigments from naturally occurring or organic materials
- Combines well with other proprietary additives or finishes for additional benefits

## AVAILABLE:

- Full range of **ProFiber™**, **UniFiber™** and **REPREVE®** yarns, including heather combinations and nylon 6 variants
- Lot availability with the potential for custom colors (minimum lbs. apply)
- Produced in US and China; available globally

## END USES:

Accessories

Apparel

Automotive

Footwear

Flooring

Furnishings

Industrial

Outdoors

Socks/Hosiery

**DISCLAIMER:** Process comparison is for making Repreve post-consumer polyester filament fibers. Process comparison represents the piece dyeing process versus the Waterwise™ (solution dye) process.
